

Benchmark notes

- LAK is safe-Rust.
- All benchmarks are single-threaded on an Apple M4 with 16 GB unified memory.
- Comparisons use OpenBLAS armv8, BLIS, and Apple Accelerate where shown.
- BLIS is omitted from Level-1 and Level-2 because this backend is not optimized for those routines.
- Accelerate is omitted from Level-2 and Level-3 because it uses Apple's AMX which is cheating.
- OpenBLAS armv8 is included throughout; but its ARM64 kernels target [Level-2](#) and [Level-3](#) most directly.
- Level-1 and Level-2 report GB/s; Level-3 reports GFLOP/s.
- All matrices are square $n \times n$.

Level-1

ASUM

$$SASUM: s \leftarrow \sum_i |x_i|$$

$$DASUM: s \leftarrow \sum_i |x_i|$$

AXPY

$$SAXPY: y \leftarrow \alpha x + y$$

$$DAXPY: y \leftarrow \alpha x + y$$

COPY

$$SCOPY: y \leftarrow x$$

$$DCOPY: y \leftarrow x$$

DOT

$$SDOT: s \leftarrow x^T y$$

$$DDOT: s \leftarrow x^T y$$

IAMAX

$$ISAMAX: i \leftarrow \arg \max_j |x_j|$$

$$IDAMAX: i \leftarrow \arg \max_j |x_j|$$

NRM2

$$SNRM2: s \leftarrow \sqrt{x^T x}$$

$$DNRM2: s \leftarrow \sqrt{x^T x}$$

SCAL

$$SSCAL: x \leftarrow \alpha x$$

$$DSCAL: x \leftarrow \alpha x$$

SWAP

$$SSWAP: x \leftrightarrow y$$

$$DSWAP: x \leftrightarrow y$$

Level-2

GEMV

SGEMV, no transpose: $y \leftarrow \alpha Ax + \beta y$

SGEMV, transpose: $y \leftarrow \alpha A^T x + \beta y$

DGEMV, no transpose: $y \leftarrow \alpha Ax + \beta y$

DGEMV, transpose: $y \leftarrow \alpha A^T x + \beta y$

GER

SGER: $A \leftarrow \alpha xy^T + A$

DGER: $A \leftarrow \alpha xy^T + A$

TRMV

STRMV, lower no transpose: $x \leftarrow Lx$

STRMV, lower transpose: $x \leftarrow L^T x$

STRMV, upper no transpose: $x \leftarrow Ux$

STRMV, upper transpose: $x \leftarrow U^T x$

DTRMV, lower no transpose: $x \leftarrow Lx$

DTRMV, lower transpose: $x \leftarrow L^T x$

DTRMV, upper no transpose: $x \leftarrow Ux$

DTRMV, upper transpose: $x \leftarrow U^T x$

DTRSV, lower no transpose: $x \leftarrow L^{-1}x$

DTRSV, lower transpose: $x \leftarrow L^{-T} x$

DTRSV, upper no transpose: $x \leftarrow U^{-1}x$

DTRSV, upper transpose: $x \leftarrow U^{-T} x$

Level-3

GEMM

$SGEMM, NN: C \leftarrow \alpha AB + \beta C$

$SGEMM, NT: C \leftarrow \alpha AB^T + \beta C$

$DGEMM, NN: C \leftarrow \alpha AB + \beta C$

$DGEMM, NT: C \leftarrow \alpha AB^T + \beta C$
